

YOUSUF KHAN

Software Engineer

+923207209829 • yk26391@gmail.com • github.com/yousuf002 • www.linkedin.com/in/yousuf-khan-461a8a277

Summary

Software Engineer with hands-on experience in full-stack web development, scalable backend systems, and machine learning workflows. Skilled in Java, MERN stack (MongoDB, Express.js, React, Node.js), Python, and PHP, with a focus on building efficient, high-performance applications. Actively seeking opportunities to contribute to impactful software projects in collaborative engineering environments.

Experience

41Labs LLC

Full Stack Developer

Islamabad

02/2026 - Present

Full stack development focused on Python and React

- Built AI-agent platforms with a 3-layer directive/orchestration/executive architecture.
- Developed full-stack Django REST + React apps with JWT auth, RBAC, PostgreSQL, and Docker.
- Built resilient scraping and monitoring services (Cloudflare bypass, bill tracking, real-estate) with Docker Compose.

Hexler Tech, NSTP

Software Engineer (Part-time)

Islamabad

01/2025 - 08/2025

Part-time position working as a Junior Software Engineer

- Designed scalable MERN applications
- Automated CI/CD pipelines
- Collaborated with cross-functional teams to improve system reliability and architecture

Education

FAST NUCES

BS Software Engineering

Islamabad

09/2021 - 01/2026

Fauji Foundation College New Lalazar

FSc Pre-Engineering

Rawalpindi

04/2019 - 06/2021

Skills

- React • Nodejs • Java • Python • PHP • Laravel • JavaFX • C/C++ • Codelgniter • Scikit learn • TensorFlow • SQL • NoSQL • GitHub
- Docker • Kubernetes • MLOps • Apache • Airflow • MLflow • GitHub Actions • Prometheus • Grafana

Projects

Real Estate Agent

An AI-powered assistant for real estate workflows

- Built an AI agent system using a 3-layer directive/orchestration/executive architecture, integrating LLMs with Python tooling and Docker to automate property data collection, client interactions, and lead handling.

Real-Time Predictive System (RPS) – MLOps Case Study

An MLOps case study with advanced machine learning techniques

- Built a production-grade MLOps pipeline with automated data ingestion, model retraining, CI/CD, containerized REST deployment, and real-time monitoring, enabling continuous model performance tracking, version control, and drift detection

POS Nimbus

A multi-role Point of Sale web application

- Developed a React-based POS system with dedicated Admin, Manager, Cashier, and Kitchen modules, using Redux/Zustand for state management, ApexCharts for analytics dashboards, and React Bootstrap for a responsive UI.
